

My O'Connor Story

Wound Care

When Penelope Nostrand of Campbell first came to O'Connor Hospital, she had struggled for years with a debilitating diabetic wound on her foot. The O'Connor Hospital Wound Care team was able to turn her life around with advanced technology and a personalized treatment plan that quickly healed Penelope's wound.

"In less than six months I was completely healed. I have my freedom back...I can drive again, walk my dogs and spend more time with my family."

Make O'Connor Care part of your story of health and healing.
